7<sup>th</sup> June 2021

Dear Residents,

It has come to the attention of the POA that there are 3 bee hives actively inhabiting a Poinciana tree on Club Lane. The POA is currently contracting with a local Bee Keeper to remove these three hives in order to preserve the hives, which are environmentally beneficial, but to remove them from Old Fort Bay. This process will take place over a period of up to one week.

In the interim, we are asking residents to exercise caution in this area and to keep children clear of the tree in question which is marked with caution tape.

Thank you for your attention to this matter.

OFB POA
